

CLEARSTONE™

CENTRAL LABORATORIES

Clinical Chemist/Clinical Biochemist

Company profile

Clearstone Central Laboratories (Clearstone) is among the largest privately owned global leader of Central Laboratory services. Through our unique network of wholly owned CAP certified laboratories, we offer central laboratory services spanning the clinical development lifecycle. Our strategically placed laboratories in the Americas, Europe and Asia are equivalently equipped and harmonized to provide consistent dependable results across programs, study phases and geographies.

Our laboratory located in Mississauga, performs approximately 1 million tests per year and is part of a global operation. The test menu covers the usual areas such as immunology and serology and includes coagulation testing, hematology and flow cytometry. Some molecular testing is being currently phased in.

We are currently looking to fill the role of Associate Laboratory Director and invite you to apply to the below email address.

Job Description

The successful candidate will work collaboratively with the Global Laboratory Director to supervise analytical and technical services within a diagnostic laboratory serving the clinical trials industry. The incumbent will be responsible for overall quality and reliability of all testing and related activities performed by the laboratory and will be responsible for the scientific and technical effectiveness of the laboratory operation.

The successful candidate will have a thorough understanding of the operation of a diagnostic laboratory including clinical, technical and regulatory aspects.

Qualifications

The successful candidate must have a Doctoral degree and must have (or be eligible for) certification in Clinical Chemistry by the Canadian Academy of Clinical Biochemistry or equivalent.

The ideal candidate will also have strong communication and excellent interpersonal skills, including tact and diplomacy. He/She will be expected to function as a consultant and advisor to internal teams and as well as to our clients. Expert problem solving skills are required to analyze test data and identify any issues or problems related to clinical trials practice and regulatory requirements.

How to apply:

Please send your resume to recruiting@clearstonelabs.com

We're a performance-driven company, operating in robust and growing markets. We have an exciting future and offer a strong development environment for our great employees. We invite you to join a company with strong core values, a commitment to employees, and a great workplace environment. At Clearstone, we know that the ultimate success of our company is dependent on the commitment and contributions of our employees.

We thank all applicants for their interest; however only those selected for interview will be contacted.
