

it takes one to know one

For our client, a international leading contract lab, we are looking for a:

DIRECTOR CLINICAL LABORATORY

The job:

You will be responsible for the general management of the clinical- and biomarker/ biopharmaceutical laboratory (approx. 45 employees) in the southern part of the Netherlands. Your key activities will be:

- maintaining contact with the Medical Experts and Trial Leaders of the Pharmaceutical Industry;
- playing a leading role in developing and applying the use of disease related biomarkers in clinical research;
- providing input and advice to the (global) Sales group and in the selection of analytical equipment and methodologies for global laboratory operations;
- being responsible for ensuring the Clinical Laboratory aspects of awarded contracts are successfully provided by the Clinical Laboratory.

The candidate:

- has a degree in medicine and post graduate qualifications in a field of Clinical Pathology, preferably Clinical Chemistry, Hematology or Endocrinology;
- demonstrable experience in the area of disease related biomarkers (preferably but not limited to the field of cardiovascular diseases);
- has a thorough and demonstrated knowledge in Clinical Laboratory organisation, management and methods of analysis used in Clinical Laboratories;
- has knowledge of Quality Assurance as it is applied in Clinical Laboratories and Clinical Research;
- has knowledge of laws, guidelines and recommendations on work in clinical laboratories.

Remuneration:

The final candidate will be offered a highly attractive and competitive remuneration package including bonus-system, pension plan, health insurance, laptop, mobile phone. There are many opportunities for personal development within this expanding company.

General information:

Our client is fully dedicated to providing standardized, high quality global central laboratory services to support all phases of clinical trials. With over 20 years of experience and scientific accomplishment, their laboratory testing portfolio has become one of the widest available in the pharmaceutical industry.
