

# “Flow across borders”

**Day 1 - 11<sup>th</sup> of March 2026**

|               |                                                                                                                                                                   |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 09:30 – 10:00 | <b>Registration with coffee</b>                                                                                                                                   |
| 10:00 – 10:10 | <b>Opening</b> (Barbara Depreter)                                                                                                                                 |
| 10:10 – 11:10 | <b>Session 1 – Clinical flow cytometry</b> (Chair: Barbara Depreter)                                                                                              |
| 10:10 – 10:40 | Flowcytometric analysis of CMML (Orianne Wagner-Ballon, Paris, FR)                                                                                                |
| 10:40 – 11:10 | Small T-LGL clones (Nathan Debunne, Bruges, BE)                                                                                                                   |
| 11:10 – 11:40 | <b>Break</b>                                                                                                                                                      |
| 11:40 – 12:00 | <b>Poster pitches</b> (Chair: Nathalie Cools)                                                                                                                     |
| 12:00 – 12:30 | <b>Company talks</b> (Chair: Malicorne Buysse)                                                                                                                    |
| 12:00 – 12:15 | Beckman Coulter: Streamlining Basophil Activation Tests (BAT): Addressing Methodological Limitations to Close Gaps in Allergy Clinical Research (Brice Ezzouaouy) |
| 12:15 – 12:30 | BD: BD Elastigate: integrating AI into everyday Flow Cytometry Data interpretation (Dennis Tielemans)                                                             |
| 12:30 – 13:30 | <b>Lunch</b>                                                                                                                                                      |
| 13:30 – 14:00 | <b>Poster viewing</b>                                                                                                                                             |

|               |                                                                            |
|---------------|----------------------------------------------------------------------------|
| 14:00 – 15:30 | <b>Session 2 – New flowcytometric tools</b> (Chair: Susan Schlenner)       |
| 14:00 – 14:30 | Spectral flow - pitfalls and possibilities (Vera Dermesrobian, Leuven, BE) |
| 14:30 – 15:00 | Super RCA for MRD analysis (Michael Dworzak, Vienna, AT)                   |
| 15:00 – 15:30 | 25 color panel for AML/MDS (Coen Veenstra, Amsterdam, NL)                  |
| 15:30 – 16:00 | <b>Break</b>                                                               |
| 16:00 – 17:30 | <b>Session 3 – Monitoring</b> (Chair: Joyce van Beers)                     |
| 16:00 – 16:30 | CTC in MM patients (Luca Bertamini, Rotterdam, NL)                         |
| 16:30 – 17:00 | MRD in AML: update ELN guidelines (Barbara Depreter, Roeselare, BE)        |
| 17:00 – 17:30 | CAR-T monitoring (André Gothot, Liège, BE)                                 |
| 17:30 - ...   | <b>Closure and drinks</b>                                                  |

## Day 2 – 12<sup>th</sup> of March 2026

|               |                                                                                                               |
|---------------|---------------------------------------------------------------------------------------------------------------|
| 09:00 – 09:30 | <b>Opening with coffee</b>                                                                                    |
| 09:30 – 11:00 | <b>Session 4 – Non-malignant diseases</b> (Chair: André Gothot)                                               |
| 09:30 – 10:00 | HLH and other histiocytic diseases (Astrid van Halteren, Rotterdam, NL)                                       |
| 10:00 – 10:30 | Development of a new fast antifungal susceptibility test for Candida auris<br>(Maarten Hendrickx, Leuven, BE) |
| 10:30 – 11:00 | PNH (Christa Homburg, Amsterdam, NL)                                                                          |
| 11:00 – 11:30 | <b>Break</b>                                                                                                  |
| 11:30 – 12:45 | <b>Session 5 – QA Program</b> (Chair: Rik Brooimans)                                                          |
|               | Results L/L QA program (Rik Brooimans)                                                                        |

Recommendations for immune monitoring (Sharon Veenbergen, Rotterdam, NL)

12:45 – 13:45      **Lunch**

13:45 – 14:45      **Session 6 – IVDR and quality issues** (Chair: Eleni Linskens)

13:45 – 14:15    Help, IVDR is coming! (Jeroen Poels/Joyce van Beers)

14:15 – 14:45    Measurement uncertainty in flow (Ulrika Johansson, Bristol, UK)

14:45 – 15:15      **Break**

15:15 – 16:30      **Session 7 – Clinical cases**

Interactive cases (Kees Meijer (Groningen, NL) and Jan Emmerechts (Bruges, BE))

16:30                **Closing remarks** (Stephan Koehorst)

**The ultimate conference for flow cytometry analysis and quality in the BeNeLux!**
